Subject: FW: meeting request

Importance: High

Hi Chris – The chain below is a stakeholder request to come in and meet with IRIS. They offer some dates below.

The meeting is on Formaldehyde – so David, Norm, Andrew and Barbara are key, in addition to Vince.
Can you please reach out to David and Antoinette to coordinate scheduling and finalize the NCEA part of invitee list?
Mary and Mike should be copied, as well.

Can you please also contact the individuals and go through your usual procedure (i.e., requesting sufficient details, asking them to provide an invitee list that includes all affiliations, requesting advance materials and letting them know both those materials and the meeting request/occurrence will be made publically available, etc.)? I'll shoot them a quick e-mail letting them know they will be hearing from you.

We would like to keep the meeting to one hour.

THANKS!

Gina Perovich
Deputy Director
IRIS Program

Barbara and Andrew,

I wanted to follow up from the last email and provide our availability over the next few weeks to see if any of these might be potential meeting dates, considering everyone's schedule. Looking forward over the next three weeks, Dr. Mundt and I are both available October 25 and 27, as well as November 2, 7, or 8. Let me know if any of these dates might be available for us to come speak with you both and/or others on the email list.

Best,
Robinan

Hi Robinan,

Thank you for your email and voicemail.

Sure, we would be interested in meeting to discuss your reanalysis. Unfortunately, however, I am on annual leave next week and so the 11th will not work.

I forwarded your messages to my managers and they will reach out to try to schedule something with you in the near future. They are cc'd on this message, as is the formaldehyde co-chemical manager, Barbara.

We look forward to speaking with you.

Regards,
Barbara and Andrew

Dear Dr. Kraft,

Hope this email finds you doing well. I am writing with regards to a potential meeting to discuss some recent work that we have been conducting for formaldehyde. Dr. Ken Mundt and I recently acquired the raw data underlying two of the key studies (i.e., Beane-Freeman et al. 2009; Zhang et al. 2010) cited in support of the original conclusion in the IRIS Draft Formaldehyde Toxicological Review that formaldehyde causes leukemia. We have reanalyzed these data, both in the context of the authors conclusions, as well as in response to NAS comments regarding the use of these studies in

estimating Inhalation Unit Risk factors. We also have performed analyses not previously conducted (or at least not reported) in the original publications. The results of these new analyses are important, and will be critical to drawing valid conclusions in the revised Formaldehyde Toxicological Review, as well as the weight of evidence for formaldehyde exposure and leukemia.

Dr. Mundt and I will be in Washington for other meetings on Tuesday, October 11, 2016 and wondered if we might have an hour or two of your time in the morning to discuss with you this new science? Please let me know at your earliest convenience.

Best regards,
Robinan
